

Filler for Unsaturated Polyester Resin

The colorless glass filler with surface treatment has superiorities in transparency and water resistance.

It is different from inorganic powder such as calcium carbonate and aluminum hydroxide, and can give design with transparency to unsaturated polyester resin.

● Uses

Bathtub, dressing table, interior panel, system kitchen, etc.

● Properties

Product No.	Composition system	Refractive index	Specific gravity	Particle size (D50)
M-80-S	SiO ₂ -Al ₂ O ₃ -CaO	1.55	2.58	30~50μm

※ The above properties are typical data and and not guaranteed.

● Effects

Glass Filler (Left) Inorganic powder filler (Right)
